

CIRCULAR NO. 102/2024

DATE: 18 OCTOBER 2024

**GLOBAL PLASTIC PRODUCTS & PACKAGING JOINT VENTURE: HIGH-GROWTH MARKET  
OPPORTUNITY FOR MALAYSIAN PLASTICS MANUFACTURER**

Capital Consulting Group (CCG), Malaysia, is seeking a plastics packaging manufacturing company for its international client, which has formed a strategic partnership with a national oil & gas company. This partnership assures a consistent supply of petrochemical feedstock (raw plastics material), providing a competitive advantage by reducing material production costs and enabling greater profitability and scalability.

Key criteria for the selection includes the following:

- a) Reputable company with proven experience in manufacturing and exporting various plastics products, for example, polyethylene, polypropylene, polyvinyl chloride, etc.
- b) Expertise in world-class packaging manufacturing with established export channels.
- c) Capability to design, build and operate a packaging plant that utilises petrochemical feedstock, with full responsibility for managing and distributing the plant's production output. The feedstock will be sourced locally.
- d) Provide expertise in managing facilities, overseeing distribution and maintaining high-quality standards.
- e) Willingness to commit at least 10% equity to the project, reflecting long-term interest.
- f) Facility/factory is to be built outside Malaysia and/or Asia.

The project titled the **Global Plastic Products & Packaging Venture**, will focus on the production of plastics products and packaging solutions across multiple sectors, including healthcare, pharmaceutical, commercial, construction materials, automotive parts, and electronics with an emphasis on global export.

Members may click on the following links to understand better about the project:
