

## Navigating the Current Challenges in the Plastics Industry

# RAW MATERIAL PRICES AND MARKET TRENDS

### Programme

- 8.30 am Registration
- 9.00 am Welcome Address
- 9.10 am **Overview on ICIS Methodology for Polymer Reporting**
- 9.20 am **Trends and Outlook of the Polyethylene (PE) Market**  
Mr Izham Ahmad, *Senior Editor, PE*
- 9.50 am **Trends and Outlook of the Polypropylene (PP) Market**  
Mr Jackie Wong, *Senior Editor, PP*
- 10.20 am Refreshments
- 11.00 am **Trends and Outlook of the Polyvinyl Chloride (PVC) Market**  
Mr Jonathan Chou, *Editor, PVC*
- 11.30 am **Panel Discussion**
- 12.00 noon Lunch
- 1.00 pm End

**RM100**  
MEMBERS

**RM120**  
NON-MEMBERS

Thursday, 20 Feb 2025  
8:30 am - 1:00 pm  
MPMA Head Office

### Overview

In Q1 2025, key developments are expected to impact both global and regional resin markets. Polyolefin capacities in the US and China are set to rise, leading to more material flowing into Asia. At the same time, slowing economic growth in China raises concerns over potential oversupply. Locally, Lotte Chemical Titan's plant shutdown and reduced PE capacity have raised worries about a possible domestic supply shortage.

Join us at the Seminar to hear from market experts on the latest raw material trends—critical for your business planning.
