

CIRCULAR NO: 192/2020

DATE: 30 DECEMBER 2020

SURVEY ON FEEDBACK TO THE PROPOSED PRIVATISATION OF CERTIFICATED MACHINERY INSPECTION BY DEPARTMENT OF SAFETY AND HEALTH

In view of the Department of Safety and Health's (DOSH) limited resources and delay in routine inspections, DOSH is planning to privatise the inspection and certification of machinery to licensed external inspection personal or companies. The proposed privatisation will have an impact on all sectors in terms of costs.

DOSH would like to obtain views from the business sector on this move to privatise the inspection and certification of machinery. This questionnaire is targeted at businesses that own, operate or rent certified machinery at the workplace.

This questionnaire aims to:

- i. Gather information related to the readiness of industry with regards to privatise the inspection and certification of machinery; and
- ii. Obtain inputs, suggestions and views from the industry to help DOSH to ensure that this privatisation proposal will benefit the industry, related government departments and the country.
